Participants: Limited to 24 participants

AIDA's Cultural Safety Training, Aboriginal and Torres Strait Islander Health in Clinical Practice (ATSIHiCP), is clinically focused and designed to assist medical practitioners integrate cultural safety into their practices to improve healthcare for Aboriginal and Torres Strait Islander patients.

ATSIHiCP equips Registrars and Fellows in any specialty with the knowledge, skills and attitudes needed to integrate Aboriginal and Torres Strait Islander holistic health and cultural safety into everyday clinical practice.

Developed and delivered by Aboriginal and Torres Strait Islander doctors, our program is enhanced by the unique insights of AIDA doctor members and a range of clinical case studies that have been experienced first-hand by Aboriginal and Torres Strait Islander doctors.

Through developing a greater understanding of Indigenous health perspectives and by undertaking a process of investigating their own perceptions, participants commence the important steps of critical self-reflection. The program aims to inspire participants to change their own clinical practice and become an agent for change for others.
